

biomar
MICROBIAL TECHNOLOGIES

BIOMAR Microbial Technologies is a biotech company founded in 1996, devoted to Marine Microbiology and Natural Products Chemistry applied to different industrial sectors.

Marine biodiversity and therefore, chemistry, has been underrepresented for decades due to the difficulties in bioprospecting the ocean.

This collection includes around 300 pure marine natural products in stock and many more on demand. New items are always being added, therefore if you do not find the substance you are looking for, do not hesitate to contact us.

Examples include:

Ordering information

- ✓ Direct via phone, email or web shop
- ✓ Via compound searching platforms such as Scifinder, ACD, Chemspider, Chem ACX and Reaxys Commercial Substances
- ✓ Via procurement platforms such as eMolecules, Amici, ChemoSapeins, ChemSpace and ScienceWarehouse/Advanced
- ✓ Searching and filtering cheminformatics available
- ✓ Different tubing and weighing options available
- ✓ Over 210,000 compounds

Did You Know?

- Many of our BIONET products are now available in Kg quantities - please contact us for more details
- Our BIONET products are guaranteed, we offer a "no quibble" refund
- Full pre- and post sales support

Key Organics

Chemistry Services

Key Organics also offers a collection of services aimed to help you with your chemistry requirements.

- Collaborative R&D
- FTE Services
- Metabolite Synthesis
- Custom Synthesis
- Stable Label Custom Synthesis
- Process R&D/Scale-up
- Analytical Chemistry
- Compound Management Services
