# BIONET Biochemicals

The Bionet Biochemicals collection contains over 1150 diverse bioactives, metabolites and hormones, including deuterated and salt forms. They are in various stages of development, from pre-clinical through to approved market drugs, and are sold for research and development purposes.

## Advantages of purchasing directly from the manufacturer:

- ✓ Ease of purchasing directly through our online shop, by phone or via e-mail
- ✓ Usually dispatched within 1 working day, from stock
- ✓ Dedicated customer relations department, real-time response

## Benefits of our Biochemicals Collection:

- ✓ Collection contains over 1150 APIs, metabolites, peptides and hormones
- ✓ Purity >97% (deuterated set >95%)
- ✓ Bulk amounts available on request
- ✓ Search by research area or by pharmacology
- ✓ New products added on a regular basis throughout the year
