

With more than 25 years experience in synthetic organic chemistry, analytical sciences and process R&D, the consultancy team at Key Organics have a proven track record of supporting businesses within a broad range of public and private organisations.

- ✓ Technology Due Diligence
- ✓ Research and Development
- ✓ Outsourcing
- ✓ Sales and Marketing
- ✓ Project Management

## Technology Due Diligence

With an extensive expertise in technology due diligence in the life sciences sector, Key Organics can help you to fully understand the technical feasibility of your project, and by identifying and mitigating risks, enable your business to proceed with confidence.

## Research and Development

Key Organics' consultancy service provides access to our well equipped and highly specialised laboratories, knowledge base and industry expertise that is the foundation of Key Organics' success. This resource coupled with the BIONET brand and our compound handling unit offer our clients a package of capabilities that cannot be sourced from any other British company.

## Outsourcing

Key Organics' extensive global network of partners are able to undertake a variety of drug substance and drug product development, and GMP manufacture to international regulatory standards. This network broadens the opportunity for our customers whilst maintaining confidence through the Key Organics brand.

## Sales and Marketing

Targeted market assessments from Key Organics assist clients by identifying new sales channels and design modifications through focused technology marketing and positioning. This process ensures Key Organics customers implement structured and targeted sales strategies ensuring maximum market impact and profit.

## Project Management

We view our clients' time and resources as precious as we do our own. That's why Key Organics has PRINCE2 accredited personnel and offers all clients access to real time reporting through the use of iLabber e-lab notebooks. We deliver results fast, whilst maintaining value.

- ✓ Enabling technologies in chemistry, drug delivery and manufacturing
